## DETAILED ACTION

### *Election/Restrictions*

1. Application's election with traverse of Invention II, in Paper No. 5 is acknowledged. The Examiner acknowledges that the classification and sub-class is the same for Group I, claims 1-30 and Group II, claims 31-60 and 66-68. However, this application contains claims directed to the following patentably distinct species in the invention I. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic. The requirement is still deemed proper for the restriction of Invention I and II.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-60 and 66-68, drawn to a system in surgical procedures, classified in class 606, subclass 169.
  - II. Claims 61-65, drawn to a method for controlling an ultrasonic surgical hand piece, classified in class 128, subclass 898.

Inventions I and II are related as apparatus and process for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to dissect tissues away from blood vessel. Because these inventions are

Art Unit: 3731

distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. In addition, if invention I is elected a further election of species is required. Invention I contains claims directed to the following patentably distinct species of the claimed invention:

Species I: Figs 2a, 2b

Species II: Figs 3a, 3b

Species III: Figs 3c-3f

Species IV: Figs 6, 6b, 6c

Species V: Figs 7a, 7b, 7c, 7d

Species VI: Figs 7e, 7f

Species VII: Fig 7g

Species VIII: Fig 7h

Species IX: Fig 7i

Species X: Figs 8, 8A

Species XI: Figs 9, 9a

Species XII: Figs 10, 10a, 10b

Species XIII: Fig 11

Species XIV: Fig 12

Art Unit: 3731

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor X Nguyen whose telephone number is (703) 305-4898. The examiner can normally be reached on M-F (8-4.30 P.M).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Milano can be reached on (703) 308-2496. The fax phone numbers for the
